
OVERVIEW

Seamless Migration is a **Service-Disabled Veteran-Owned Small Business (SDVOSB)** consulting firm which specializes in engineering solutions meant to streamline business processes. Our goal is to help organizations discover, implement, and maintain solutions which evolve and mature with their ever-changing business needs.

CAPABILITIES

SERVICENOW: Our ServiceNow team specializes in App Engine/UI Builder, Integrated Risk Management (IRM)/Governance, Risk and Compliance (GRC), Continuous Authorization & Monitoring (CAM), and Security Operations (SecOps)

CYBER SECURITY: From FedRAMP certification to the Risk Management Framework, Seamless Migration has extensive knowledge with NIST policies and guidance.

CODE, LOW-CODE, NO-CODE: With our extensive knowledge as full stack developers, we can easily develop custom solutions from the ground up or on existing low-code/no-code platforms.

SOFTWARE MIGRATION: Seamless Migration can give our customers the confidence in moving from one software/tool to another by automating their data migration.

CLOUD/DEVOPS: Seamless Migration focuses on being cloud agnostic by leveraging tools such as Terraform, Ansible, and Kubernetes. Additionally, we develop CI/CD pipelines for consistent and automated deployments.

UI/UX DESIGN: Our design team can architect and produce both effective and easy to use solutions by leveraging modern UI/UX practices and upholding the latest design standards regardless of the solution a business selects.
