

## OVERVIEW

**Seamless Migration ("Seamless")** is a **Service-Disabled Veteran-Owned Small Business (SDVOSB)** consulting firm which specializes in engineering solutions meant to streamline business processes. Our goal is to help organizations discover, implement, and maintain solutions which evolve and mature with their ever-changing business needs.

*Seamless includes personnel with clearances up to the TS/SCI (with Poly) level*

## CAPABILITIES

**SERVICENOW:** Our ServiceNow team specializes in an array of products and solutions across the platform. With a combined 10+ years using ServiceNow, we have completed successful implementations for customers both large and small, in both the private and public sectors.

### Solutions

- App Engine (custom apps)
- Integrated Risk Management (GRC/IRM)
- Security Operations (SecOps)
- IT Operations Management (ITOM)
- IT Service Management (ITSM)
- CMDB
- UI Builder
- HR Service Delivery (HRSD)

**CYBER SECURITY:** We allow organizations to take control of their cyber security risk posture and requirements by leveraging automation. Our team has experience with frameworks such as NIST, FedRAMP, CMMC, and more. We help organizations achieve their accreditations as well as streamline and automate their compliance processes using modern web solutions including ServiceNow, RSA Archer, and more.

RMF

FedRAMP

CMMC

**CODE, LOW-CODE, NO-CODE:** With our extensive knowledge as full stack developers, we can easily develop custom solutions from the ground up or on an existing low-code/no-code platform. At the end of the day, we focus on finding the solution that works best for each of our customers. Everyone's requirements are different, and we are ready to adapt and apply our skill sets however necessary to deliver a quality product.

## CAPABILITIES CONTINUED

**SOFTWARE MIGRATION:** Seamless Migration can give our customers the confidence in moving from one software/tool to another by automating their data migration. Our team can ensure an easy and seamless migration from custom built solutions to commercial SaaS offerings such as Salesforce, ServiceNow, and Archer. Making this transition can be intimidating and time consuming, our engineers have completed

**CLOUD/DEVOPS:** Seamless Migration focuses on being cloud agnostic by leveraging tools such as Terraform, Ansible, and Kubernetes. Additionally, we develop CI/CD pipelines for consistent and automated deployments.

**SYSTEM ADMINISTRATION:** Whether its Linux or Windows, our team has extensive knowledge in system administration. DISA STIG hardening for compliance, vulnerability patch management, and automation of configuration with Ansible.

**UI/UX DESIGN:** Our design team can architect and produce both effective and easy to use solutions by leveraging modern UI/UX practices and upholding the latest design standards regardless of the solution a business selects.

**AGILE / SCRUM:** Our team and company operates in an agile manner. We have experience in being a SCRUM Master, Product Owner, and as developers on a Scrum/Kanban team.

**CROSS DOMAIN SOLUTIONS:** We have integrated with several cross-domain solutions to automate and move development to the unclassified environments. We have built pipelines that once merged into the main branch, will move through a cross-domain to the higher environment, unpack, and deploy.

**BIG DATA ANALYTICS AND VISUALIZATION:** We have engineers that specialize in big data and establishing data lakes. We utilize tools such as Snowflake, Tableau, ELK (Elastic Search, LogStash, Kibana), Splunk, Spark, Hadoop, and programming languages (Python and R).
